Craig

please see the attached pix as a follow up to the voicemail I left you, 2nd one today, this is after I discovered water in our breaker box and 1 breaker tripped tonight before I discovered this. WHEN I went to the breaker box to look at resetting the breaker for my computer, here is what I found...

This needs to be handled and resolved once and for all now.. I've already emailed the pixs to the BBB to follow up on the case that I had to open last June 2005, 1 year later water still in the basement.. Not as a threat but tomorrow I will be engaging Hyatt legal services and this will be resolved quickly as this is way too much, I've waited TOO long and this issue still isn't resolved! Additionally had this issue been corrected a long time ago like it was supposed to, we would be way past this.. You can always thank Rick and Michele for that, this needs fixed now...

Please review the pixs and call me asap so we can discuss how long it will take before our breaker box arcs..

Dave
